Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant contends that the reference to Lawecky does not disclose a step of sterilizing the container after the container is enclosed in a second container as recited in claim 1; that neither references to Lawecky and Logothetis discloses a step of transferring glass syringe barrels to a housing for maintaining a predetermined cleanliness after annealing the syringe barrels at a temperature of 500 degrees C as recited in claim 19; and that the step of air cleaning the tip caps recited in claims 33 and 37 is different from air flowing disclosed in the reference to Lawecky because the tip caps are delivered from outside of the controlled environment. The examiner does not agree but will reconsider as applicant will file an official response to the final rejection mailed January 27, 2003.
